Manager and Editor.

APPOINTED BY THE POST OFFICE AT WENDELL,  
MASS., SEPTEMBER 23, 1882.

FRIDAY, AUG. 14, 1903.

With 74,000 post offices within its borders, the United States leads all other powers of the world in this, as in most other things. Germany comes next with 45,000 offices and Great Britain third with 22,400.

Many of our local G. A. R. veterans are attending the Thirty-seventh National Encampment at San Francisco, and that their trip may be attended with all the enjoyment possible, is the wish of all their Weymouth friends.

There is at least one profession that is not over-represented, in proportion to the numbers that are coming from all parts of the country; the difficulty is securing a sufficient number of teachers for the opening of schools next month.

Also and last! Late reports from California, the champion prize raising state in the union, bear the distressing news that this year's prize crop will be about 120,000,000 pounds, about one-third less than last year's yield. What will our hotel and boarding house keepers do now?

In an attempt last week to reach the bedside of his daughter before she died, Mr. Henry F. Lowe of New York, made a record-breaking trip across the continent. The elapsed time from the minute he left New York until he arrived in Los Angeles, 73 hours and 21 minutes. The distance travelled was 321 miles, thus making the average rate of speed nearly 45 miles an hour.

The annual exhibition and fair of the Weymouth Agricultural and Industrial Society occurs a week earlier than usual this year, on the 11th and 12th. And today is not too late to commence advertising the event. The Weymouth Fair could be given much more publicity if every citizen of Weymouth would take a personal interest in it. That's what has made the great Brockton Fair what it is, and that would much toward making our own even more successful this year.

There is no longer any room in this country for the so-called "in soldier," and he will soon be a thing of the past, if the new militia law works as is expected. In commenting upon this new law, the New York Sun says: "Every man who joins the militia must serve this year, and do so with his eyes open. He will hold himself subject to the call of the National Government in time of need, and he will see the necessity of satisfying the medical examiners that he is fit for such service. He will be drilled according to the methods of the regular army, and he will get five days' field service every year. His uniform will not be as pretty as it used to be, but he will know a heap more. He will play soldier much less, and far fewer to the real thing. It is a good law."

The condition of the country's grain crops is not encouraging at the beginning of the present month. The government report published this week shows a decline in condition in all crops as compared with the first of July, and a poor condition in comparison with the ten year average of the season. The corn crop, which before was badly damaged by heavy rains and very late, has lately suffered from cool weather. Spring when it goes, back ward instead of forward, and the winter wheat which is already heavily thinned, does not come up to the expectation. The same can be said also of oats, but the rye, barley, etc., are above the average, as are also potatoes. A comparison of the conditions of the crops is as follows:

	Aug. 1	July 1	Aug. 1, year ago	Aug. 1, 1902
Corn.....	70.4	70.4	68.5	68.5
Oats.....	70.4	70.4	68.5	68.5
Rye.....	70.4	70.4	68.5	68.5
Barley.....	70.4	70.4	68.5	68.5
Potatoes.....	67.3	66.1	64.5	64.5

Representatives of two automobile clubs in New York have issued circulars addressed to automobile clubs throughout the country, calling to be held on September 7, for the formation of a national organization for the promotion of the interests of motor cyclists. Copies of this circular have been forwarded to the various clubs of the country with the request that it will be given publicity. It is being given publicity all right, but in many cases it is not the most flattering kind. An idea of the spirit and sentiment in which the circular was written, may be obtained from the following paragraph:

"In a democratic Republic like ours, in which all men are supposed to be free and equal, that among other things one class of citizens should be shamed out for special taxation—should be required to pay for the use of the public roads and to carry a brand or tag attesting such discrimination. It is damnable that this class of citizens cannot freely pass from one State into another without fear of arrest because of such laws. To combat such measures—to lead the right ways are free to all, and to the right to be free is irreconcilable, is one of the objects to be served by our organization."

After reading the above, and more of a similar nature, one does not wonder at the fact that the press of the country is doing but little to assist the project.

The following facts and figures concerning the present condition of trade and shipping in the United States are furnished by the New York Bureau of Trade and Transportation, which organization, through its committees in the Merchant Marine, is desirous of securing a free discussion of methods for the rehabilitation of our Merchant Marine.

"It is a fact, that the United States of 1810, with seven million inhabitants, owned more registered tonnage for overseas trade than the United States of 1903 with a population of eighty millions. This tonnage in 1810 was 96,000 tons. It is now 975,000, and we still have 100,000 tons actual tonnage of these thousand tons from the time before 1810. In 1810, American ships and American sailors carried 9.5 per cent. of their country's coastwise trade, and moreover, a great share of that of Europe. In 1861, though we had already lost our Atlantic steam lines, and our ship building was failing down, we still carried 65.3 per cent. of our trade,

some of the trade of other nations. American ships last year conveyed only 8.9 per cent. of our imports and exports. Our regular tonnage in 1861 stood at 2,000,000, and it stands now at 173,000. Two-thirds of our once great and powerful deep-sea fleet has vanished—and not one new keel for a sleep-sea ship is being laid on either our Atlantic or Pacific coast line. Meanwhile, an ever increasing fleet of foreign vessels throngs our ports and monopolizes the carrying of more than nine-tenths of our imported and exported merchandise. The United States has to leave foreign ports for carrying our freights and passengers (upwards of one hundred million dollars a year). Much of this vast sum of money goes to steamers which are regularly enrolled in the mercantile armament of European governments whose navies are available against us in war. The British Empire has 14,000,000 tons of merchant shipping, Germany 2,000,000 tons; France 1,400,000 tons; Italy 1,000,000 tons; Spain 1,000,000 tons; Portugal 800,000 tons; Russia 700,000 tons; and the present Alaska Coast and one of the British Isles.

The British Empire has 14,000,000 tons of merchant shipping, Germany 2,000,000 tons; France 1,400,000 tons; Italy 1,000,000 tons; Spain 1,000,000 tons; Portugal 800,000 tons; Russia 700,000 tons; and the present Alaska Coast and one of the British Isles.

The British Empire has 14,000,000 tons of merchant shipping, Germany 2,000,000 tons; France 1,400,000 tons; Italy 1,000,000 tons; Spain 1,000,000 tons; Portugal 800,000 tons; Russia 700,000 tons; and the present Alaska Coast and one of the British Isles.

The British Empire has 14,000,000 tons of merchant shipping, Germany 2,000,000 tons; France 1,400,000 tons; Italy 1,000,000 tons; Spain 1,000,000 tons; Portugal 800,000 tons; Russia 700,000 tons; and the present Alaska Coast and one of the British Isles.

### BROKEN and WORN JEWELRY

Required and sent at moderate expense. Rings, Brooches, Pins, Chains, and Lockets, all thoroughly renovated and cleaned, old parts repaired and jewels reset or replaced at short notice. Valuable jewelry should be examined from time to time, and loosened jewels adjusted to prevent their loss.

All Repairs promptly attended to Low Charges.

### WEYMOUTH AND EAST BRAintree.

—Mr. and Mrs. J. G. Worster are at Lake Pleasant for the month. Mrs. Worster filling an engagement at that resort with the Ladies Schubert quartet.

—Miss Alida Allen of J. G. Worster & Co's store is spending a three week's vacation at North Woodstock.

—Charles F. Gotterson left on Saturday for a two weeks' trip through New York.

—Miss Hazel Baker is vacationing at Green Harbor.

—Miss Vesta Dobson of Hayward street is at the Weirs for a week's outing.

—William H. Cronin left Saturday for a visit to relatives in California.

—Mrs. Anna Bergeron and children of New York are visiting local relatives.

—A little daughter was born Monday to Mr. and Mrs. Benjamin DeYoung of Banks avenue.

—Mr. Herbert A. Vinton returned yesterday from the hospital, where she has been for the past few weeks.

—Miss Louise Davis of Gloucester, Mass., is the guest of Miss Bessie M. Bailey of Webb street.

—Mr. and Mrs. George H. Perkins of Quincy avenue are at York Beach, Maine, for a week's outing.

—Frank Riley is the guest of friends in Woonsocket.

—Miss Elizabeth McKeon of Boston and Miss Annie L. Coffey are at Old Orchard, Me., during the month of August.

—Geo. Hart is clerking for Hart's Clothier during the absence of W. H. Cronin.

—Rev. Mr. Monroe will preach at the Baptist Church next Sunday morning and evening. Mr. Clegg will preaching at the First Baptist Church, Cambridge.

—A benefit party for the benefit of the Sunday School classes of Miss S. Jane Clapp and Miss Emma L. Clapp, front street, was held at the residence of the latter teacher last Saturday afternoon from 2:30 to 5 o'clock.

The affair was well attended and a success. Open air amusements of various kinds were enjoyed. Among them being a peanut hunt and a potato race, but the crowning feature of the afternoon's entertainment was the lunch which was enjoyed by all.

The foundation is being laid this week for a handsome new wall to be erected at the St. Francis Xavier cemetery.

The wall will extend the entire length of the middle side of the cemetery and will cost when completed, about \$2,000.

—Lewis R. Tilden is spending his vacation at Bear Creek, at the summer home of Dr. Davidson, Dorchester.

—William C. Mason, formerly of the Castle Square Theatre Company, leaves next Tuesday on a tour of New England with the "Quincy Adams Sawyer" Company.

—Contributions of flowers for the Mutual Helpers' flower show, Boston, may be sent to Miss Emma L. Clapp, front street, next Monday evening.

—Miss Louise Richards is enjoying a brief respite from her duties at the Taft's Library.

—Miss Fannie Palmer of Worcester was the guest of Mrs. M. A. Clark over Sunday.

—The Misses Helen and Alice Clapp have been the recent guests of Mrs. A. Rogers at Rose Cliff.

—Mr. and Mrs. Wallace R. Blackwell of Front street are being congratulated upon the birth of a little son last week.

—Mrs. John A. Neals is at North Woods, N. H., for a few weeks.

—The Misses Carrie and Estelle Hobson, students at Internals, N. H.

—Christopher Webb is visiting his mother, Mrs. Samuel Webb of Commercial street.

—Mr. Francisco Wentzworth is spending the week with his daughter, Mrs. Fred Mannion of East Boston.

—Mrs. Jessie L. Gaynor and Frederick Fleming Hale, respectively director and manager of the Gaynor Studios of St. Joseph, Missouri, are the guests of Mrs. Theodore L. Tyndale.

—Some farmers are changing their operations very much, because of the scarcity of help. In some cases they are putting in forage crops with a view to winter dairying because they can take care of the cows themselves during the winter, when there is less work to do on the farm.

In other cases these crops are being produced as feed for beef cattle next fall and winter. In still other cases men who have been in the habit of cultivating large areas are planning this spring to plant just enough to keep the cattle from starving on the farm.

—Some farmers are changing their operations very much, because of the scarcity of help. In some cases they are putting in forage crops with a view to winter dairying because they can take care of the cows themselves during the winter, when there is less work to do on the farm.

—Mrs. John A. Neals is at North Woods, N. H., for a few weeks.

—The Misses Carrie and Estelle Hobson, students at Internals, N. H.

## WESTWOOD GROVE.

### Weymouth's Inland Summer Resort of Which Little Is Known.—Cottages and Cottages.

It's "dollar to doughnut" that the average Weymouth is not aware of the fact that there is a prosperous summer colony at Westwood Grove, and many people do not even know where the place is.

Westwood Grove is often confounded with Lakeview Park, which is located at the head of Whisman's Pond, but the owners and residents of the charming summer homes along the west shore of the pond, are very emphatic in their desire to have the place known by its proper name—Westwood Grove.

The grove is composed of pine and oak trees which give a cool shade for a long time or more of cottages with their mock eaves, chairs, and window tables which make them like them. It is an excellent place for a few days' vacation, rest and health in the very air.

Nest is entirely eliminated because there are no pavements, street cars or heavy teams, and the ground is covered in many places with pine needles, that in themselves, are a source of health, and which also deaden every sound, making the place practically noiseless.

The people, most of whom own their own cottages, are congenial souls from Cambridge, Somerville, Chelsea, Charlestown, and the suburbs of Boston. They are also good hosts, and as such, their representation as ideal entertainers, has impressed them, and their homes are nearly always filled with friends they have made in previous summers here, or with brother or sister lodger members from the home city.

While there has been a semblance of order in laying out the streets, one can find a cottage hidden away among the trees in the most unexpected places. The cottages are well built, roomy, and fitted with all the conveniences that comfort can suggest.

Among the attractions of the place, one of the residents said it took a horse and wagon to bring me here and I guess, by George, it will take two to get me away.

Among the people met by the reporter were frenemy from the Boston and Cambridge departments, retired business men, theatrical people with wide reputation, public enterprisers, veteran Grand Army men, and several ladies from the various clubs and societies in greater Boston.

"Curie" of hachet fame has recently made the acquaintance of another jail. If she continues her amazing career, she will soon be the most imprisoned person in the country.

Judging from the American people's knowledge of Pauli and her habits, the fears of some theatrical managers that she will not make us another farewell tour, would seem to be groundless.

King of Sheba of Abyssinia has purchased a mint which will be put in operation at Adela Aspin. If his majesty is in need of a cratidion of the new institution, we know of a man in Weymouth who might be persuaded to accept the position.

"Talk happiness—The world is safe enough without your woe." This motto is displayed in a conspicuous position in the store of one of Weymouth's well known business men. It's a splendid motto, and all of us would get a great deal more enjoyment out of life if we would live up to it.

Good hard American dollars continue to pour into Germany with a steady stream which is to say the least must be pleasing to the Kaiser's subjects. During the last fiscal year, the United States purchased \$19,700,000 worth of goods from that country; an increase of \$10,000,000 over the preceding year.

The twenty-five per cent. reduction in the salary of the president of the United States Steel Company, would seem to indicate that the wage standard in the country is on the downward trend.

Mr. Schwab's salary will receive \$7,000, and by the way, getting strict economy, should be able to make both ends meet.

Perhaps if the first year of his executive administration is attended by successful results, the directors may vote him an increase at the next annual meeting.

New Yorkers, if no other people in the country, are bound to get clean milk. Before he can secure certification of his product by the milk commission of his city, the New York dairymen must have a clean cream sour in his stable, have the walls of the building whitewashed, and have it painted with white paint, and when it is painted, his cows must be spayed and their tails scrubbed, and their attendants must wear white uniforms.

Bottles and all utensils must be sealed, and the filled jars must be kept on ice and shipped only in refrigerator cars.

"Old Home Week" all over the state, gave birth to some significant utterances. Here is a story from Old Deaford's collection. These boys were discussing their ages and birthdays. One of the lads said he was twelve years old, and that his birthday had just passed on a certain day. Another was ten, and his birthday came at such a time that this boy had nothing to say to him. "What you know about your year?" asked one of his companions. "No, I don't know."

"Well, why don't you ask your mother?" "She doesn't know." "Why, yes she does, know, of course she does." "No she doesn't, she wasn't home, when I was born. She was at the club. There wasn't nobody to home but grandmas and me."

The Hark Monk, the "stage driver" of the pioneer days in the far West was immortalized by Mark Twain in his "Houghtaling It." The stage coach in which Hark Monk got Horace Greeley, "What you know about your year?" asked one of his companions. "No, I don't know."

The other evening, when one of the Fore River employees was going into the post office, I heard a couple of pretty little girls talking about the weather. One of the girls said, "I am going to the beach this afternoon." The other girl said, "I am going to the beach this afternoon."

The other girl said, "I am going to the beach this afternoon."

The other girl said, "I am going to the beach this afternoon."

**WEYMOUTH GAZETTE.**  
PUBLISHED EVERY FRIDAY BY THE  
GAZETTE PUBLISHING COMPANY,  
(BOSTON CORPORATION.)  
WEYMOUTH, MASS.  
CHARLES H. WILLOBY,  
Manager and Editor.  
EDIFIED BY THE POST OFFICE AT WEYMOUTH  
WASH., AS SECOND-CLASS MATTER.

FRIDAY, AUG. 28, 1903.

The two-minute trotter has come at last, and the fondest hope of the breeder has been realized.

When the penalty for breeding is set at a fine of a penny \$100, this certain is transformed into quite a profitable business.

The rapid increase of German's foreign commerce is causing considerable distress among British merchants in all of the ports of the world.

The re-election of Booker T. Washington to the presidency of the National Negro Business League, makes it evident that the recent Boston episode did the most harm to those who caused the disturbance.

Canada has expended approximately \$100,000,000 on its waterways, and thinks it has been money well expended. If the United States were to make a proportional expenditure it would mean an expense of \$1,000,000,000.

Summer, like most towns, has a few common drunks, who are a continual annoyance—Somerset Standard.

Weymouth also has a few representatives of the class, and they are considerably worse than a mere annoyance.

A New Orleans broker and his followers are credited with having cleared \$7,000,000 on their recent corner of the cotton market. The country as a whole, however, would have been better off to-day if these few speculators had "gone broke."

"A knowledge of swimming should be preferred to a knowledge of higher mathematics," says a physician in an article in the Massachusetts Medical Journal, and the great number of deaths by drowning which occur every year justifies this opinion.

Of 1,000,000 men making returns to the American Federation of Labor for June with an aggregate membership of 58,719, there were 2 1/2 per cent. out of employment. For the preceding month the percentage of unemployed was 5.3 per cent. out of a membership of 104,895.

Those Americans are a pleasure-loving people it is known by the fact that they have invested about \$50,000,000 in pleasure yachts, which militate at an expense of about \$6,000,000 each season. And this is only one of many ways in which our people find their pleasure.

The recent strike in Philadelphia's tea industry caused a loss of \$17,500,000. There is money in arbitration, and the sooner this method of settling disputes between labor and capital is generally appreciated, the better it will be for all concerned, either directly or indirectly.

James J. Corbett got badly bruised in his recent encounter with James Jeffries, but he received \$11,000 for stopping the giant's blows and if the off dollars afford any relief to a bruiser, the one-time champion ought to be able to get himself back into pretty fair shape.

Will mirages never cease? On the 30th of next month Kentucky's colonial will reflect the contents of a jug of liquor which was sealed for 100 years. A jug of liquor remaining undisturbed in Kentucky for an entire century! Just think of it. September 26, 1903, should go down as a red letter day in the state's history.

A plausible reason for the busyness unsuccessful attempt of inventors to produce a practical flying machine is furnished by a prominent Chicago engineer who declared that the inventor never meant to fly in the air to be navigated! This explanation may save some of our ambitious seekers for glory from a panzer's grave.

It is said that next year the fest of lifting the cup will be undertaken by Canada. That would please the American people all right, for a new contestant will be very welcome. The trophy is pretty securely fastened, but it should be let go, but at the same time we're already ready and willing to give the other fellows a show.

The good thing about an automobile is it seldom inflicts pain. It generally kills instantly.—"Echance.

True enough, and sad to relate, it seldom claims the proper person as its victim. A few days ago, however, we read of an instance in which one of these marbles became unmanageable, ran away, and killed the chauffeur.

Prof. Meyer suggests that fire escapes be utilized for the open-air treatment of consumption in tenement houses. This suggestion, while undoubtedly made in good faith, may cause the nation's poor added oppression. Landlords in the tenement districts of our great cities are quite apt to make their tenants pay for all the advantages furnished, whether they are utilized or not.

"There is gladness in her gladness when she's glad, and there is sadness when her gladness is gone and the sadness of her sadness are nothing to her sadness when she's mad."

Thus soliloquizes an editor upon the gentler sex. This editor is a married man and possibly speaks from experience, but who would have thought a newspaper man capable of saying such a mean thing?

Out in the "Blue Grass" state there is a woman, who when she goes a visiting pulls the baby's crib up in front of the telephone, opens the receiver, and tells Central to call her up at the neighbor's if baby begins to cry. And this particular baby is a remarkably well mannered youngster; this arrangement must keep the interminable graphophone attachment pretty busy calling out "Ring off, the line is busy."

Dr. G. Campbell Morgan gives the following instructions concerning the reading of the Bible: "The Bible should be read as you look; begin at the beginning and read through to the end. This can be done in state school. After the first reading, the reader should review it, and read through again, then examine and discuss as analysis of your own. Thirdly, meditate. I must search the Bible because it is searching me. After,

## HOW TO SWIM.

Burns Was Showing His Friends.

Dorchester Young Men Drowned at Hockley.

James Burns of Dorchester was drowned at Hockley last Sunday morning, within full view of a number of friends. About ten o'clock Burns announced that he was going in bathing and soon after he entered the water. When a short distance from the beach, he shouted to his friends on shore, "I'll show you how to swim." He was overtaken until the water reached the middle of his chest, when the sunbathers screamed, threw up hands and ropes were thrown toward the spot where he disappeared in the hope that he would be able to seize them. He did not rise, however, and the work of dragging the boy was begun. At about two o'clock Frank Whalen and Thomas White of East Weymouth recovered the body about fifty feet from the spot where Burns disappeared from sight.

The accident occurred very properly, according to the officials, who became interested in the case, and the boy was not condemned to good sanitary conditions about the pond. Complaints had been made to the authorities that the pond was becoming polluted, and the town was advised to prohibit bathing in it more or less frequently. They have varied from the man who thought the gunning stands should not be allowed, the shore to the tax was overpaid, most strenuously to a man's eyes having been drawn to the water and driven them away.

"It is a mystery to me," said a well-known man about town to the writer, "why they allow boys about the lake in the places they do. The land all slopes toward the water and the heavy rainstorm will wash the refuse matter into the water just as sure as water runs down a hill." The boy was about four years old.

"I think everything depends upon what kind of a man has water to drink at his camp," was the view of another interested in the question. "I have watched water pretty closely." And concluded, "and I find that the man who is a user of town water at home, takes mighty good care of his camp while the fellow who gets his drinking water from a well, is less likely to keep up his standards."

Another place met the reporter at the lake, and he may say that with very few exceptions, the shores and adjacent properties are remarkably well kept. The ponds have been found to be in excellent condition.

As the reporter rowed down the pond toward the starting point, he cogitated upon the different natures with which the water commissioners had to deal, and noted the various methods used to keep the water free from all impurities, while at the same time the fisherman had some right in his claim.

At the water's edge, the reporter asked the boy about the cause of the drowning.

Collector Pratt of the water board, when approached upon the subject, talked interestingly about it and gave some very good information to the reporter. Among the first things he said was: "No one has any desire or intention of depriving anybody of their pleasure provided they keep within the sanitary limits and do not make a nuisance of their place."

The reporter asked the master as to what he thought of the water from the standpoint of safety. The master has been called to the attention of the state board of health and any action now taken will be through him. Represented by the reporter, he pointed out the fact that the water was perfectly safe, and that the boy had been swimming in a swamp a few feet away from the house.

Another waterman place for castle was pointed out by a reliable and experienced fisherman who said that the boy was a "dorg."

## WEYMOUTH HISTORICAL SOCIETY.

Report of Old Home Week Committee.

It is appropriate that the committee, whose hands the Weymouth Historical Society committed the details of arranging for and carrying out the first celebration of Old Home Week in our honored town, should report their doing.

We may truthfully say, we review the occurrences of last week, now become historic, that while the town at its last meeting appointed this society to take entire charge of its official observance of Old Home Week, and made us responsible for the expeditious or appropriation thereof, it gave the initiative to those who were most anxious to have a series of celebrations as often taken place within its borders.

Your committee might very properly, in view of the fact that the town has been so anxious to have a series of celebrations as often taken place within its borders, have recommended to the town that we be given the use of the town hall, or some other suitable building, for the holding of the meetings.

After much consideration, the town has decided to give us the use of the town hall, and we are grateful for this, as we could not have obtained it otherwise.

Our first meeting was held on Saturday evening, August 22, at 8 o'clock.

Mr. George E. Brock, President, opened the meeting with a brief address, followed by a short talk by Mr. Charles H. Allen, Vice-President.

Mr. Charles E. Brock, Secretary, then read a paper on the history of the town, and the early days of Weymouth.

## Photographs.

WE ARE OFFERING  
Special Inducements  
to  
Weymouth and Braintree People  
WHO INSURE

First Class Photographs.  
And we pay your car fare.

Linton's Studio, ROCKLAND,  
MASS.

C. B. HOUSTON & CO.,  
QUINCY, MASS.

Masons, Plasterers,  
AND  
General Contractors.

Jobbing Promptly Attended to.

P. O. Address:  
Dennis H. Cleary, 45 Phillips St. Weymouth,  
Mass.

Frank A. Soother, Quincy.

## "MANYWHERE"

Now a man there was, and he coined a word,  
From his "hypnotist" dictionary;  
It described a tempestuous blow, I heard,  
And the man who touched off that dynamo-blast.

But it has come across "many-auch."

But he knew ere he hit of a brand new word.

That described what he got—"many-much!"

He another man with a facile pen,  
Wrote a song on this word "one-time,"  
And he hoped he'd get a check "any-when."  
For his short "many-many-blank."

But response to his hope was not "the-same-thing."

A man said "one-time!"—

But he got a rejection that made him sick.

And they put out his trunk "bestill!"

"Manywhiles" I have did on this "muchy!"

"Manywhink" has my poor brain whirl,  
And I've dreamed "dailight" that I really

Give "manywhere" to the world;

But it makes "upmind" that it ain't

It's a nameless old job anyhow;

I will make "nowhere" of 'em now;

We have got "manywhere" of 'em now!

Baltimore News.

moring of the first day and suddenly the Indians started to the attack of the houses. At sunrise they lashed on the mosa to the east of the village and chanted the song of the "Habitat Hunt." This was the signal of their approach. The Jones issued

calls. It was now noon and he will call up from the earth in a flame a thousand times larger than our sacred flame which your people take from the truthful Jones. It will roll over this town, like the flood with its hundred thousand, who touched off that dynamo-blast.

But he knew ere he hit of a brand new word.

That described what he got—"many-much!"

The afternoon had been apparently hot. The sun went down in a flame of fire and the Indians were still in the village, like the flood with its hundred thousand, who touched off that dynamo-blast.

But he knew ere he hit of a brand new word.

That described what he got—"many-much!"

The Indians had been apparently hot. The sun went down in a flame of fire and the Indians were still in the village, like the flood with its hundred thousand, who touched off that dynamo-blast.
